Subject Part 161 Bob Hope Airport

JUL - 2 A 9 13

DEPT OF TRANSPORTATION
DOCKETS

Victoria Catlett

Burbank is a small, lovely, productive town. We have struggled to keep it clean and peaceful. The Bob Hope Airport is a busy and productive part of Burbank. The night time flights, in this small crowded city are very destructive. Most of the population start work, in the early morning hours and being awakened during the night time hours, being sleep deprived, has created a very serious health problem. It's a really good airport and it should stay that way. I don't see how it can, if we don't start to limit night time flights. We have taken more than our share of pollutants and noise for over 14 hours a day, for many years. We have seen what happens with the frenzy of demanding more and more and the need to increase everything from more cars, more traffic, more oil, more trucks, more FLIGHTS. Burbank has been committed to cleaning up the air, water, streets, etc. Restricting night time flights, into and out of Bob Hope Airport, would be a big help toward healthier, happy, peaceful living with fewer health issues, for the heavily populated, Burbank and North Hollywood area. The daytime flights are uncomfortable, dirty and noisy but we're up and working at doing everything we can, to clean the air, quiet the noise pollution, etc. Night time flights cause, not only physical illnesses but serious mental and emotional, as well. . Night flights for the very few ... at the cost of the very many. Sincerely, B. Kingsley
